

## MS CUTTY JEAN

### World's First Boat Powered by Plastic Waste

SEA-CLEAN is a German based non-governmental organization committed to delivering marine waste reduction.

Our concept combines resources and knowledge across different technologies.

What we are most proud of is our proof tested prototype machine that converts ocean-based plastic waste into fuel.

SEA-CLEAN launched the traditional ship CUTTY JEAN as the world's first boat powered by plastic waste.

The next phase of the SEA-CLEAN project requires further equipment.  
Help us fight together for plastic free oceans. Donate now.
